Waste PVC windows and doors

Environmentally friendly

Wood-Grain is manufactured from 92% recycled materials. In using Wood-Grain you can be assured that you are protecting the world's natural resources and helping the environment.

Use With Existing Posts

Eco Fencing can be easily used to replace your rotten timber panels in concrete posts. Simply remove your old panels and slot the Eco gravel boards into the slots to the desired height. A quick and simple solution.

“ What Our Customers Think ”

R French from Hemel Hempstead ...

I am a fencing contractor of 35 years and today I used your pvc posts for the first time, and I was impressed, I shall be including them in my quotations in the future , as you say much easier to work with than concrete posts, they are a bit more expensive, but I really liked working with them.

Mr Johnson from Harrogate ...

We had eco fencing fitted just before the severe gales and it really is as strong as they say. The posts swayed in the gale and when it was over they were all perfectly straight and my fence was still intact, unlike most of my neighbours whose had blow over or had been blown out. A great product really pleased with it.

Mr Jones from Wales ...

ECO Fencing is a fantastic product and was very easy to install, it look fantastic and the best thing about it is no maintenance. Since having the fencing installed i have had lots of people ask me where it was purchased.

Steve Lowe from West Sussex ...

The Eco fencing gravel boards and posts look great. I didn't realise they were stronger than wood and concrete until my neighbours fence fell in the high winds and mine kept standing. I fitted them myself and what an easy job it was as they are so light and easy to work with.

Mr Jones from Kent...

What a great product. the gravel boards simply slotted into my existing concrete posts. All done in less than an hour, it took more time getting to the tip with my old rotten panels.

The Complete Fencing Solution

Can be cut with a handsaw

Because Eco Fencing is so easy to cut, Gravel Boards can be easily trimmed to suit popular European fence panels which are 1.8m wide. Wood-Grain will also accept screws to secure your fence into position.

Easy To Cut

Accepts Screws

Lightweight

ECO FENCING HAS A STRONGER TENSILE STRENGTH THAN CONCRETE POSTS ...

The concrete post cracked and could not therefore recover, rendering the post non-serviceable. The Eco post deflected the same amount, it follows therefore that Eco Fencing posts possess a significant tensile strength that concrete posts do not.

Stephen Barker, I.Eng. M.I.I.E., Chief Test Engineer

Anti Theft Clip

Protect your fencing against theft.

Supaspike & Bolt Down

The Supaspike is incredibly easy to install. Just drive it into the ground and place the post over the top of the spike. For solid surfaces such as driveways and pavements use the Supaspike Bolt Down.

Eco Fencing has strength

In independent testing Wood-Grain proved that it has a much greater tensile strength than concrete posts, as the combined weight of 56 stone demonstrates! It will even flex in strong winds.

Replace your rotten panels

Simply remove your old panels from your concrete posts and then slot the Eco Fencing gravel boards in place. In an instant you have a maintenance free fence which not only looks good but is easy to install and never needs treating

Looks and feels like wood

Eco Fencing's unique finish will add beauty and complement your garden for years to come. Unlike concrete Wood-Grain's dual face means you can also share the cost.

Incredibly Light

At around 5KG's Eco Fencing is a pleasure to work with. Eco Fencing is incredibly light and strong, making general handling and transportation easy. The health & safety risks ever present with concrete fence posts are eliminated.
